Art Unit: 1772

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-17 and 24, drawn to a process, classified in class 156, subclass 95.
 - II. Claims 18-23, drawn to an article, classified in class 428, subclass 121.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the process can be used to make a different article than that claimed such as an article wherein the pallet does not have a configuration for transport by a fork lift.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. During a telephone conversation with Mr. Brown on February 28, 2002 a provisional election was made with traverse to prosecute the invention of Group I, claims 1-17 and 24. Affirmation of this election must be made by applicant in replying to this Office action. Claims 18-23 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.
5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 1772

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1, 9, 14, 16 and 24 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Miller ('750). See column 7, lines 46-63.

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. Claims 2, 11 and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Miller ('750). The reference discloses the invention substantially as claimed; see column 7, lines 46-63. However it does not disclose completely filling the pallet, storing the pallets outdoors or storing the pallets side by side and upon one another. It would have been obvious to one of ordinary skill in the art to completely fill the pallets, and store them in side by side and stacked upon one another configuration in order to maximize the use of the storage facilities. It would have been obvious to one of ordinary skill in the art to store the pallets in any convenient location such as outdoors.

9. Claims 10, 13 and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Miller ('750) in view of Pignataro ('083). The primary reference discloses the invention substantially as claimed; see column 7, lines 46-63. However it does not disclose removing the sidewalls from the tread. The secondary reference discloses removing the sidewalls from the tread prior to shipping in a recycling process; see

Art Unit: 1772

column 1, lines 12-18 and column 3, lines 60-64. It would have been obvious to one of ordinary skill in the art to remove the sidewalls from the tread, as taught by the secondary reference, in the process of the primary reference to provide a uniform article for transportation if extra processing steps could be tolerated.

10. Claims 3-8 and 12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alexander S. Thomas whose telephone number is 703-308-2421. The examiner can normally be reached on M-F 6:00-3:00.
